

# Unlock Enterprise AI

With watsonx + Power Systems

# Introductions

Chris Chapman  
Cloud Practice Lead,  
PMSquare

Tom Horan  
VP of Cloud and Managed  
Services, Meridian IT

Azer Khan  
Program Director,  
IBM Power, IBM

# Agenda

- The Industry Landscape
- Use Cases
- Technical Deep Dive – Demo
- Q&A

# Industry Landscape

## Strong Foundations Win

Leaders succeed by building solid data, security, and compliance frameworks.

## Success Starts With Clear Outcomes

High-impact AI projects begin with well-defined business goals, not just model deployment.

## Efficiency Gains, But Slow Adoption

AI is delivering 30–40% improvements, yet many organizations **remain stuck in pilot mode**.

## Workflows Beyond Chatbots

AI-driven business processes are now boosting employee productivity at scale.

# AI Use Cases in the Real World

## Analyst Research Assistant

- Search and aggregate multiple internal and external sources for expedited research tasks

## Knowledge Assistant

- Scan and synthesize lengthy or numerous documents for faster analysis

## Agentic Order Processing

- Initiate workflows that query, update and interact with multiple systems to process customer orders faster

## Business Intelligence

- Allow business users to interact directly with backend databases without the need for data analyst/engineers
