

Cut VMware Casts. Unlock More Value.

The Problem

Post-Broadcom, licensing costs are climbing while innovation has stalled, leaving organizations stuck with dated, rigid architecture. The platform can't support modern DevOps or AI initiatives, restricting flexibility and growth. As a result, businesses are paying more each year for less capability.

"The tipping point is now, most organizations are planning their exit."

Our Offer

We help you move off VMware with a phased, low-risk approach designed to minimize disruption and maximize long-term value.

Full environment and
dependency analysis

TCO and cost-savings
model

Phased migration
plan

Optional hardware
buyback

VMware support during
migration

Relocate

Move to Amazon
Elastic VMware Service

Rehost

Lift and shift VMware
VMs to Amazon EC2
