SaaS anywhere

Managed Services By PMsquare

What is SaaS Anywhere?

SaaS Anywhere is the way to a Software-as-a-Service experience with your Incorta* environment.

It provides organizations **ongoing managed services** enabling enterprise-scale deployment and support for data analytics technologies with the security of a long-term partnership.

Core Benefits

Cost Efficiency: SaaS Anywhere is the cost-effective approach for managing and supporting all or part of your Incorta solution. Optimize your resources with competitive rates and flexible team sizes tailored to your project needs.

Scalable Development Teams: Achieve steady progress in your projects with our flexible development teams, composed of both onshore and offshore experts. This scalability ensures continuous development and the ability to adapt to your evolving needs.

Incorta Expertise: Maintain uninterrupted analytics capabilities regardless of internal staff changes or varying levels of technology expertise. Your critical systems will be available whenever and wherever you need them, supported by our deep knowledge and expertise in Incorta.

Reliable Support: Benefit from our proven methodology and global support, ensuring an optimized environment that allows you to focus on your strategic objectives.

Proactive Approach: Our team monitors works loads and addresses problems proactively . We troubleshoot the source of the problem and attempt to fix it before users notice an issue.

What Makes This Offering So Special?

PMsquare combines its **global team**, **proven Incorta expertise**, and **proprietary software** to provide best-in-class **in-house** design, development, deployment, and support services, making us a complete solution provider for your Incorta needs.

SaaS Anywhere reduces costs, advances analytics initiatives, and eliminates headaches for you and your organization.

You Ask, We Deliver
