# PMsquare Telemetry Anywhere

Data Driven Insights

What is it?

Telemetry Anywhere is a comprehensive, plug-and-play Managed Services Platform that delivers scalable telemetry, monitoring, and insights across diverse IT platforms. It integrates seamlessly with various data sources, leveraging generative AI for proactive intelligence. Equipped with intuitive dashboards and real-time alerts, it empowers decision-makers with actionable insights to optimize performance and drive informed business strategies.

Key Features

- **Data Collection and Correlation:** Connects to on-premises, cloud, and hybrid environments.
- **Prescriptive Analytics:** Uses ML and AI to detect patterns and anomalies.
- **Real-Time Alerts and Dashboards:** Provide intuitive visuals.
- **Flexible Integrations:** Works with data visualization, APM, ARM, NPM, ITSM, and collaboration tools.

Why?

Enhanced Decision-Making: streamline data capture for data-driven decisions

Improved Operational Efficiency: reduce downtime by identifying bottlenecks

Boosted Customer Satisfaction: enable faster issue resolution.

FAQs

Who is Telemetry Anywhere for?

CIOs/CTOs: Maximize ROI from tech investments

IT/Cloud Operations Managers: Early issue detection

Data & Analytics Leaders: Predictive insights

Application Development Managers: Optimize application performance

What data sources are supported?

Cloud apps, on-premise systems, APIs, and databases are all supported.

Is there customizability of dashboards?

Telemetry Anywhere dashboards can be tailored for specific roles.

Are there alerting capabilities?

Yes, there is the option to implement notification via email, SMS, and collaboration tools.

What are the unique features?

Telemetry Anywhere is scalable, easy-to-integrate, with insights for diverse roles.

What is Telemetry Anywhere compatible with?

Telemetry Anywhere is compatible with cloud, on-prem, and hybrid environments.
