

Ensuring Robust Security and Compliance in Your AWS Environment

What is it?

A 2-week, fixed-fee assessment enhancing overall security strategy and provides continuous improvement, ensuring your data remains safe. Moreover, it maintains customer trust by safeguarding their data, ultimately saving you from costly breaches and associated remediation efforts.

Why?

Protects sensitive information and ensures compliance with regulations

Proactively manages risks and mitigates threats

Builds trust, safeguards reputation, and avoids vulnerabilities

Prevents breaches and client data exposure

What to Expect

A Cloud Security Posture Assessment (CSPA) evaluates vulnerabilities, ensures compliance, and optimizes security practices. It identifies gaps, prioritizes risks, and recommends improvements with continuous monitoring. Following the assessment, we outline remediation steps and ongoing security measures.

PMSquare's Approach

Business Review → **Assessment** → **Recommendations** → **Implementation**

How to Get Started

The engagement begins with a complimentary, no-obligation [Ideation Session](#). In this collaborative half-day workshop we provide a platform where you can engage with our GenAI thought leaders to identify use cases, explore opportunities and craft impactful concepts tailored to your business. The Ideation Session kickstarts the Cloud Security Posture Assessment and will help us to outline remediation steps and ongoing security measures.

Initiate: Reach out to our team to schedule an Ideation Session and kickstart your GenAI journey.

Prepare: Complete a pre-workshop questionnaire to tailor the agenda.

Collaborate: Engage in a dynamic workshop to exchange ideas.

Activate: Move forward with the optimal path towards GenAI.

You Ask, We Deliver
