FAQs

Who is PMsquare?

We are an AWS Partner with expertise in data, analytics, and cloud solutions. Our focus is on generating real, quantifiable outcomes that drive growth, efficiency, and innovation within your organization. We understand the intricacies of the digital landscape, so we tailor cloud solutions that match your specific needs, ensuring your business operations run seamlessly.

What is PMsquare's EDP Optimization Assessment?

The EDP Optimization Assessment is an analysis of the money you spend you spend with AWS in accordance with your EDP agreements. We provide prescriptive recommendations to streamline AWS costs, maximize the business value of your spend, optimize cost, and solution performance.

What types of AWS clients can benefit from this assessment?

This assessment is beneficial for a wide range of AWS customers, from businesses looking to optimize their AWS usage with a near term EDP deadline to those with EDP commitments with a longer runway. The prescriptive recommendations are applicable at any phase of the EDP cycle.

What does the delivery of this offering look like? How long does the assessment typically take?

The duration of the assessment will vary based on your AWS environment's complexity. The process involves a thorough examination of your AWS ecosystem, data analysis, and the formulation of tailored recommendations. A typical analysis can be completed within two weeks.

When is the best time to take action and schedule the free assessment?

There is no bad time to engage with PMsquare on this exercise, as overall optimization is at the heart of it. However, it can be uniquely valuable as you approach contract time horizons to efficiently plan and take advantage of our expert guidance and advice.

Is the AWS Assessment truly free, or are there any hidden fees? Will this cost me more money in the long run?

This assessment provided by PMsquare is completely free, with no hidden costs. Optimization of existing commitments will have a negligible impact on your long-term costs.

What is Spot by NetApp?

Spot by NetApp is the 'easy button' for CloudOps teams. It is a platform that automates and continuously optimizes cloud compute infrastructure, helping companies reduce their compute costs by up to 90% while ensuring scalability and availability.

Does this offering effect my security?

The security of your data and AWS environment is a top priority for PMsquare. We take stringent measures to ensure the confidentiality and protection of your information throughout, and after, the assessment.

How do I get started and schedule the free AWS assessment with PMsquare?

To get started and schedule your free AWS assessment with PMsquare, simply reach out to our team. We're here to guide you through the process and help you take the first step toward AWS optimization and EDP commitment.
